DCF Assumptions: Revenue growth was anchored to Nestlé’s historical performance, with FY26A growth of 14% and the historical average supporting a normalized base assumption of 10%. The forecast gradually moderates toward 6% by Year 5, supported by the Excel trend forecast and the expectation that growth normalizes as the business matures. The assumptions also consider management’s focus on volume growth, pricing, premiumisation, distribution and future investments. A 12.11% WACC and **4% terminal growth** were used to reflect a mature, established FMCG business while keeping the valuation assumption conservative and defensible.
